

Please DO NOT weaken New Jersey's current laws regarding the DO NOT CALL law. Telemarketers are very annoying and will not take NO for an answer. They are some of the rudest people I've ever encountered. In fact, I would also like to see something passed that requires either a telephone number or the name of the person/company making the call show in the display for those of us who have caller identification. We cannot even report these types of calls because there is no indication as to who the caller is or the phone number they are calling from.
